

The Hoofcare Experts

PRODUCT LIST

You want your horse to be as happy and as healthy as possible

...and our experts at Keratex Hoofcare know this. We have developed a specially formulated range of products designed to deal with a whole host of hoof care issues. We also offer DIY treatments designed to repair and correct cracks and replace missing horn and are constantly bringing out new products.

Browse through our range to see if we have something to suit your needs.

Keratex Hoof & Leg Scrub

Keratex Medicated Hoof & Leg Scrub is formulated using revolutionary antimicrobial Byotrol technology (www.byotrol.com), and is available in a 300ml trigger spray bottle. The product foams on contact and can be scrubbed or sponged onto hooves, frogs, soles, heels and pasterns. Importantly it can also be used on leg abrasions to thoroughly cleanse and disinfect scabs or damaged skin, making it ideal for mud fever, injuries or cracked heels or simply to maintain a bacteria-free environment on the legs and hooves.

Available in 300ml spray bottle.

Keratex Cooling Gel

Keratex Cooling Gel is unlike other cooling gels in the market, in that it does not contain menthol or camphor. Menthol and camphor simply temporarily numb the 'hot' nerve receptors, whereas Keratex Cooling Gel actually cools by evaporation. This makes it a safe, highly effective and competitive product on the shelf. We recommend the 'thermometer test'.

Available in one litre container

Keratex Hoof Disinfectant

Keratex Hoof Disinfectant is a site-specific disinfectant developed using a patented formulation from Byotrol. This fantastic nozzle-tipped bottle can be used in awkward gaps and ruts in your horse's hooves and soles. It works by forming a totally safe, waterproof, breathable coating wherever it is applied.

Available in 200ml bottle.

PRODUCT LIST

Keratex Hoof Wash

Keratex Hoof Wash is a revolutionary disinfecting hoof and fetlock soak that has taken the market by storm. Keratex Hoof Wash will help to protect the horse against a whole range of common ailments. It is also extremely effective in assisting the horse's natural defences against most bacteria and fungi.

Available in one litre bottle.

Keratex Hoof Hardener

The perfect product to use if your horse suffers from brittle or weak hooves. Acting specifically on keratin, the protein which forms most of the hoof, this treatment's strengthening qualities have made it a popular choice among horse owners. Many of the country's top riders and their teams already use this product. Hoof Hardener can be used in conjunction with shoeing, but some owners choose the hardener as a complete alternative and run their horses barefoot. If your horse has brittle, weak hooves, or you don't want to shoe your horse, Hoof Hardener will work for you.

One 250ml bottle lasts for around three months

Keratex Hoof Gel

Designed for wet weather use, Keratex Hoof Gel forms a protective, hydro-repellent layer over the hoof, keeping horn water-tight and preventing splitting and expanding as it dries out. If your horse falls victim to soft, sodden hooves, try Keratex Hoof Gel.

Available in one litre and 500ml bottles.

Keratex Hoof Moisturiser

Specifically designed for use on dried-out and brittle hoof horn, Hoof Moisturiser has water-retaining qualities which helps prevent cracking and hoof break-up in warmer temperatures. If your horse suffers from dry, cracked hooves, this is the product for you.

Available in one litre or 500ml bottles.

Keratex Hoof Putty

This product is great for repairing holes in the soles of a horse's feet. The adhesive, filling mixture also disinfects any cavities, making it the perfect aid to recovery for punctures, abscesses and so on.

Available in 200gm tins.

PRODUCT LIST

Keratex Hoof Shield

Does exactly what it says on the tin! This tough varnish leaves a crystal-clear shiny finish which dries in seconds. Great for shows and smart days out.

250m plastic bottle, with application brush supplied.

Keratex Frog Disinfectant

This is a powerful antibacterial squirt. Its site-specific function gets right to the heart of the frog, killing bugs fast and preventing infection. Now with tea tree oil!

Available in 50ml squeeze bottle format

Keratex Mud Shield Powder

This powder has a hydrophobic and antibacterial action. It is ideal for use on legs which are prone to mud fever. The talc coats your horse's legs, repelling both water and germs. Antibacterial and antifungal qualities means a whole host of problems associated with wet, muddy legs can be prevented.

450gm easy-to-use sprinkler pack

Keratex Nail Hole Disinfectant

Open nail holes in hoof horn can be a powerful source of white line infection. We have found that squirting this powerful disinfectant into nail holes is an effective way of beating bacteria and preventing white line disease. The formula also acts on the inside wall of the hole, hardening it so that further splits and cracks can be prevented.

200ml squeeze bottle.

Keratex 3P Hoof Repair

This epoxy kit has been developed to replace and repair missing horn. Simply clean and dry the hoof, mix the paste and use the spatula to apply. You will be amazed at the results!

50ml kit includes formula, spatula, double syringe for easy application and a mixing pot.

ORDER DETAILS

Keratex Cosmetic Hoof Filler

Ideal for shows and best turned out, this product is easy to apply and will make ugly cracks disappear while keeping the area free from germs. These unique waxy rub sticks are available in both light or dark colours.

Four 15gm long-life crayons in each tube.

Keratex Feed Supplement for Hooves

Keratex Feed Supplement for hooves contains all the vitamins, minerals and trace elements your horse could need for healthy hooves in one fell swoop! We are sure you will be impressed with the results.

One 3kg pack lasts for around 60 days
